iPath® Long Enhanced MSCI Emerging Markets Index ETN

The iPath® Long Enhanced MSCI Emerging Markets Index ETN is designed to provide investors with leveraged return on the performance of the MSCI Emerging Markets Net Total Return Index (the "Index"). The ETNs are riskier than ordinary unsecured debt securities and have no principal protection. The ETNs are unsecured debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. An investment in the ETNs involves significant risks, including possible loss of principal, and may not be suitable for all investors. The MSCI Emerging Markets Net Total Return Index is a free float-adjusted market capitalization Index that is designed to offer a representation of equity market performance of emerging markets.

The Index is a free float-adjusted market capitalization Index that is designed to offer a representation of equity market performance of emerging markets. Owning the ETNs is not the same as owning interests in the equity securities comprising the Index or a security directly linked to the performance of the Index. For additional information regarding the risks associated with the ETNs, please see "Selected Risk Considerations" below.

Summary

| | |
|----------------------------------|-------------------------------|

| Investor Fee Rate | 0.80% per annum ² |
| Automatic Termination Level | \$25.00 per ETN ⁴ |
| CUSIP | 06740P874 |
| ISIN | US06740P8749 |
| Inception Date | 29 November 2010 |
| Maturity | 30 November 2020 |
| Financing Rate | 3m LIBOR + 0.60% ⁵ |
| ETN Participation Ticker | EMLBF.PTNV ⁶ |

Market Indicators (as of 04/30/2019)

| | |
|------------------------------------|-----------|
| Closing Indicative Note Value | \$124.26 |
| Market Capitalization ³ | \$619,809 |
| ETNs outstanding | 4,988 |
| Financing Level ⁵ | 119.79 |
| Participation ⁶ | 1.96 |
| Long Index Amount ⁷ | 244.04 |

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investment, when sold or redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. See additional information below for how return figures are calculated. **PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS**

1. **Intraday Indicative Value.** The "intraday indicative value" meant to approximate the value of the ETNs during the current trading day by reference to the underlying index is calculated and published during the course of each trading day. The intraday indicative value is intended to provide investors with an approximation of the effect that intraday changes in the level of the underlying index would have on the closing indicative value of the ETNs. The intraday indicative value only reflects the accrued investor fee and other applicable costs at the close of business on the preceding day, but does not include any adjustment for the investor fee or applicable costs accruing during the course of the current day. For more information on how the intraday indicative value is calculated, please see the section "Valuation of the ETNs" in the prospectus relating to the ETNs.

The intraday indicative value is provided for reference purposes only. It is not intended as a price or quotation, or as an offer or solicitation for the purchase, sale, redemption or termination of the ETNs, nor does it reflect hedging or transaction costs, credit considerations, market liquidity, or bid-offer spreads. Published index levels from the sponsors of the indices underlying the ETNs may occasionally be subject to delay or postponement. Any such delays or postponements will affect the level of the index and therefore the intraday indicative value of the ETNs. Index levels provided by the sponsors of the indices underlying the ETNs do not necessarily reflect the depth and liquidity of the underlying markets for the index components. For this reason and others, the actual trading price of the ETNs may be different from their intraday indicative value.

2. **The investor fee rate** per ETN is equal to 0.80% per year: The investor fee on the inception date was equal to zero. On any subsequent calendar day until maturity or redemption, the daily investor fee per ETN will equal the product of (a) the applicable closing indicative note value on the immediately preceding calendar day *times* (b) the fee rate *divided by* (c) 365. Because the daily investor fee is calculated as part of the financing level through which it is subtracted from the closing indicative note value on a daily basis, the net effect of the daily investor fee accumulates over time and is subtracted at a rate per year equal to 0.80% per year.

3. **Market Capitalization** = Closing Indicative Note Value x ETNs Outstanding.

4. **Automatic Termination Level.** Barclays Bank PLC will automatically redeem your ETNs (in whole only, but not in part) if, on any calendar day prior to or on the final valuation date, the intraday indicative note value for the ETNs is less than or equal to \$25.00 or 25% of the principal amount of your ETNs.

5. **The financing rate** will equal the sum of (a) 0.60% *plus* (b) the most recent 3month London InterBank Offered Rate (LIBOR) fixing for U.S. dollars effective on the immediately preceding business day, as published by the British Bankers' Association on Bloomberg page "US0003M Index". The daily financing charge on the inception date was \$0. On any subsequent calendar day until maturity or redemption of the ETNs, the daily financing charge per ETN will equal the product of (a) the applicable financing level on the immediately preceding calendar day *times* (b) the financing rate *divided by* (c) 360.

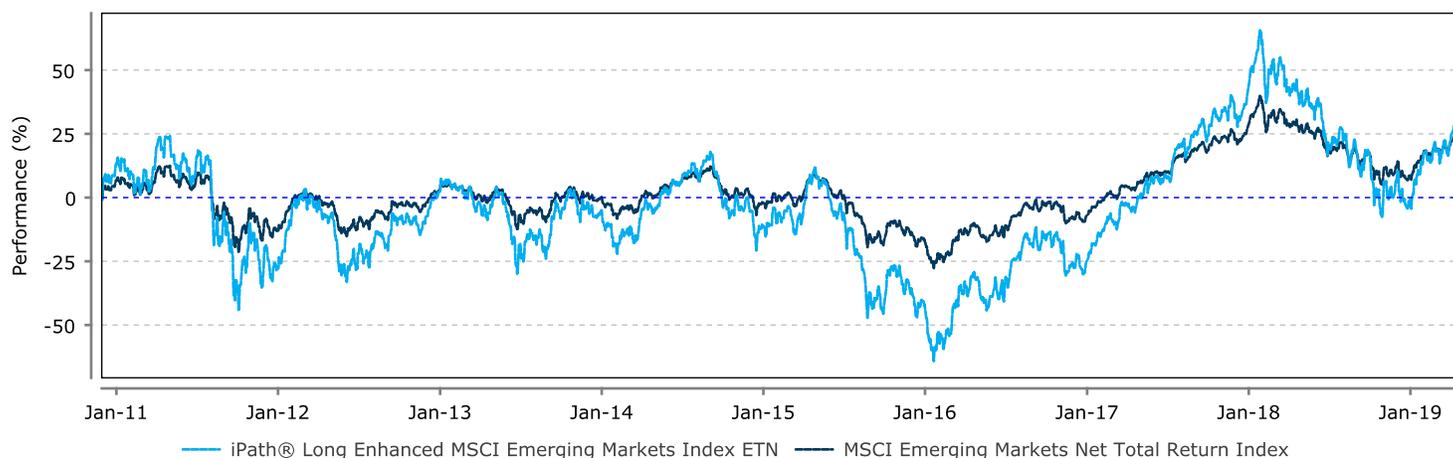

The financing level on any calendar day until maturity or redemption will equal the sum of (a) the applicable financing level on the immediately preceding calendar day *plus* (b) the daily financing charge *plus* (c) the applicable daily investor fee.

6. **The participation** is intended to approximate the ratio of the value of the notional exposure per ETN to the performance of the Index relative to the value of each ETN, as described in more detail in the product prospectus.

7. **Long Index Amount.** On the initial valuation date, the long index amount per ETN was \$200. On any subsequent calendar day until maturity or redemption, the long index amount per ETN will equal the product of (a) the applicable long index amount on the initial valuation date *times* (b) the applicable index performance factor on such calendar day.

The index performance factor on the initial valuation date was equal to 1. On any subsequent calendar day until maturity or redemption, the index performance factor for the ETNs will equal (a) the closing level of the Index on such calendar day (or, if such a calendar day is not an index business day, the closing level of the relevant Index on the immediately preceding index business day) *divided by* (b) the closing level of such underlying Index on the initial valuation date.

ETN and Index Historical Performance

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investment, when sold or redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. See additional information below for how return figures are calculated. **PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS.**

Index Returns

Index returns show the change in the level of the index underlying the ETNs over the relevant period, expressed as a percentage. Index returns are calculated using the closing index level from the beginning of the relevant period to the end of the relevant period. For any historical period of one year or longer, index returns are shown on an annualized basis. Index returns are for illustrative purposes only and do not represent actual ETN performance. Index returns do not reflect any management fees, transaction costs, or expenses which would reduce your actual return, including the investor fee and applicable costs of the ETNs. Indexes are unmanaged and one cannot invest directly in an index.

ETN Closing Indicative Note Value Returns

ETN closing indicative note value returns show the change in the closing indicative value of the ETNs over the relevant period, expressed as a percentage. For any historical period of one year or longer, closing indicative note value returns are shown on an annualized basis. The closing indicative note value of an ETN is an amount per ETN calculated on each valuation date that reflects the change in value of the ETN from the previous valuation date due to the daily change in the index level and the daily accrual of the investor fee and other applicable costs. The closing indicative note value of an ETN may differ from the actual trading price of the ETN at any time due to hedging or transaction costs, credit considerations, market liquidity, bid-offer spreads or other factors affecting the trading price of the ETN. For more information on how the closing indicative note value is calculated, please see the section "Specific Terms of the ETNs" in the prospectus relating to the ETNs.

ETN Market Price Returns

ETN Market price returns show the change in the end-of-day trading price of the ETNs on the exchange over the relevant period, expressed as a percentage. Market price returns are calculated using the midpoint of the bid/ask spread at 4:00 pm Eastern time (or the last midpoint of the bid/ask spread prior to 4:00 pm Eastern time) from the beginning of the relevant period to the end of the relevant period. For any historical period of one year or longer, market price returns are shown on an annualized basis. Market price returns do not represent the returns you would receive if you traded at a price or at a time on the exchange other than as described in this section. Market price returns do not account for brokerage commissions, which will reduce actual returns, and may not include the effect of any applicable fees

and costs on the ETNs.

In the event that there is an absence of a bid/ask value at 4PM on the relevant month end, N/A will be displayed in place of a percentage value for ETN Market Price Returns.

Correlations (as of 04/30/2019)

| Index | Correlations* |
|--|---------------|
| MSCI Emerging Markets Net Total Return Index | 1.00 |
| MSCI EAFE® Net Total Return Index | 0.77 |
| S&P 500® Total Return Index | 0.59 |
| Bloomberg Commodity Index Total Return SM | 0.53 |
| Barclays US Aggregate Bond Index | 0.16 |

Sources: Bloomberg Finance L.P., Barclays, MSCI Inc., S&P Dow Jones Indices LLC. Correlations are calculated on a monthly basis over a 5-year period from the "as of" date referenced above.

* Correlation is a term used to describe the statistical relationship between two or more quantities or variables. Perfectly correlated assets will have a correlation coefficient of one, while the correlation coefficient will be zero when returns on two assets are completely independent.

Index correlations are for illustrative purposes only and do not represent actual ETN performance. PAST PERFORMANCE IS NOT INDICATIVE FOR FUTURE RESULTS.

- The S&P 500® Index is intended to provide an indication of the pattern of stock price movement in the U.S. equities market.
- The Bloomberg Commodity Index Total ReturnSM reflects the returns that are potentially available through an unleveraged investment in the futures contracts on physical commodities comprising the index plus the rate of interest that could be earned on cash collateral invested in specified Treasury Bills.
- The MSCI EAFE Index is an equity index which captures large and mid cap representation across Developed Markets countries around the world, excluding the US and Canada
- The MSCI Emerging Markets IndexSM captures large and mid cap representation across 21 Emerging Markets countries.
- The Barclays U.S. Aggregate Bond Index provides a measure of the performance of the U.S. investment grade bonds market.

Selected Risk Considerations

An investment in the iPath ETNs described herein (the "ETNs") involves risks, including possible loss of principal, and may not be suitable for all investors. Selected risks are summarized here and select product specific risk factors are summarized under "Select Risk Considerations" on the relevant product pages, but we urge you to read the more detailed explanation of risks described under "Risk Factors" in the applicable product prospectus.

You May Lose Some or All of Your Principal: The ETNs are exposed to any decrease in the level of the underlying index between the inception date and the applicable valuation date. Additionally, if the level of the underlying index is insufficient to offset the negative effect of the investor fee and other applicable costs, you will lose some or all of your investment at maturity or upon redemption, even if the value of such index level has increased or decreased, as the case may be. Because the ETNs are subject to an investor fee and other applicable costs, the return on the ETNs will always be lower than the total return on a direct investment in the index components. **The ETNs are riskier than ordinary unsecured debt securities and have no principal protection.**

Credit of Barclays Bank PLC: The ETNs are unsecured debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Barclays Bank PLC will affect the market value, if any, of the ETNs prior to maturity or redemption. In addition, in the event Barclays Bank PLC were to default on its obligations, you may not receive any amounts owed to you under the terms of the ETNs.

Automatic Redemption: If specified in the applicable prospectus, Barclays Bank PLC will automatically redeem a series of ETNs (in whole only, but not in part) at the specified automatic redemption value if, on any valuation date prior to or on the final valuation date, the intraday indicative note value of the ETNs becomes less than or equal to the applicable level specified in the prospectus.

Market and Volatility Risk: The market value of the ETNs may be influenced by many unpredictable factors and may fluctuate between the date you purchase them and the maturity date or redemption date. You may also sustain a significant loss if you sell your ETNs in the secondary market. Factors that may influence the market value of the ETNs include prevailing market prices of the U.S. stock markets, the index components included in the underlying index, and prevailing market prices of options on such index or any other financial instruments related to such index; and supply and demand for the ETNs, including economic, financial, political, regulatory, geographical or judicial events that affect the level of such index or other financial instruments related to such index.

Your Return May Be Affected By Factors Affecting International Security Markets: The international equities underlying certain indices sponsored by MSCI, Inc. may have less liquidity and could be more volatile than the securities traded in the U.S. or other longer-established securities markets. Additional special risks associated with international securities may include less rigorous regulation of securities markets, different accounting and disclosure standards, government interference, higher inflation, and social, economic, and political uncertainties.

Leverage Risk: Because an investment in the ETNs is leveraged, changes in the level of the underlying index will have a greater impact on the payout on the ETNs than on a payout on securities that are not so leveraged. In particular, any decrease in the level of the underlying index will result in a significantly greater decrease in the payment at maturity or upon redemption, and an investor will suffer losses on an investment in the ETNs substantially greater than an investor would if the ETNs did not contain a leverage component.

A Trading Market for the ETNs May Not Develop: Although the ETNs are listed on a U.S. national securities exchange, a trading market for the ETNs may not develop and the liquidity of the ETNs may be limited, as we are not required to maintain any listing of the ETNs.

No Interest Payments from the ETNs: You may not receive any interest payments on the ETNs.

Restrictions on the Minimum Number of ETNs and Date Restrictions for Redemptions: You must redeem at least 25,000 ETNs of the same series at one time in order to exercise your right to redeem your ETNs on any redemption date. You may only redeem your ETNs on a redemption date if we receive a notice of redemption from you by certain dates and times as set forth in the product prospectus.

Uncertain Tax Treatment: Significant aspects of the tax treatment of the ETNs are uncertain. You should consult your own tax advisor about your own tax situation.

Barclays Bank PLC has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus and other documents Barclays Bank PLC has filed with the SEC for more complete information about the issuer and this offering. You may get these documents for free by visiting www.iPathETN.com or EDGAR on the SEC website at www.sec.gov. Alternatively, Barclays Bank PLC will arrange for Barclays Capital Inc. to send you the prospectus if you request it by calling 212-528-7990, or you may request a copy from any other dealer participating in the offering.

The ETNs may be sold throughout the day on the exchange through any brokerage account. Commissions may apply and there are tax consequences in the event of sale, redemption or maturity of ETNs.
