

## iPath Exchange Traded Notes

# iPath® Dow Jones-UBS Aluminum Subindex Total Return<sup>SM</sup> ETN

iPath Exchange Traded Notes (ETNs) are senior, unsubordinated, unsecured debt securities issued by Barclays Bank PLC delivering exposure to the returns of a market or strategy with the trading flexibility of an equity. The iPath® Dow Jones-UBS Aluminum Subindex Total Return<sup>SM</sup> ETN offers investors cost-effective exposure to aluminum as measured by the Dow Jones-UBS Aluminum Subindex Total Return<sup>SM</sup> (the “Index”). Investors can trade on an exchange at market price or receive a cash payment at the scheduled maturity date or at early redemption<sup>1</sup>, based on the performance of the Index, less investor fees.

### NOTE DETAILS

Ticker	JJU
Intraday indicative value ticker	JJU.IV
Bloomberg index ticker	DJUBALTR
CUSIP	06739H321
Primary exchange	NYSE Arca
Yearly fee	0.75%
Inception date	06/24/08
Maturity date	06/24/38
Index	Dow Jones-UBS Aluminum Subindex Total Return <sup>SM</sup>

\* The investor fee is equal to the Yearly Fee times the principal amount of your securities times the index factor, calculated on a daily basis in the following manner: The investor fee on the inception date will equal zero. On each subsequent calendar day until maturity or early redemption, the investor fee will increase by an amount equal to the Yearly Fee times the principal amount of your securities times the index factor on that day (or, if such day is not a trading day, the index factor on the immediately preceding trading day) divided by 365. The index factor on any given day will be equal to the closing value of the index on that day divided by the initial index level. The initial index level is the closing value of the index on the inception date of the securities.

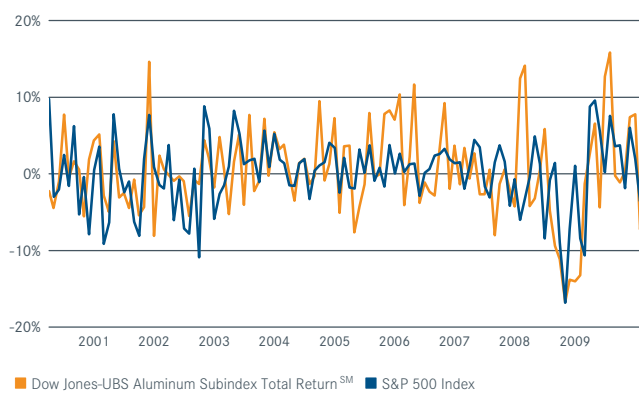

### ISSUER DETAILS

Barclays Bank PLC long-term, unsecured obligations*	
S&P rating	AA-
Moody's rating	Aa3

The iPath ETNs are not rated, but are backed by the credit of Barclays Bank PLC. The iPath ETNs rely on the rating of their issuer, Barclays Bank PLC.

\* We have not obtained a rating from any rating organization with respect to the iPath ETNs. A security rating is not a recommendation to buy, sell or hold securities, and each rating should be evaluated independently of any other rating. A security rating is subject to revision or withdrawal at any time by the assigning rating organization, and there is no assurance that any security rating will remain in effect for any given period of time or that it will not be lowered, suspended or withdrawn entirely by the applicable rating agency. Any such lowering, suspension or withdrawal of any rating may have an adverse effect on the market price or marketability of the iPath ETNs.

An investment in iPath ETNs involves risks, including possible loss of principal. For a description of the main risks see "Risk Factors" in the applicable prospectus.

Barclays Bank PLC has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus and other documents Barclays Bank PLC has filed with the SEC for more complete information about the issuer and this offering. You may get these documents for free by visiting [www.iPathETN.com](http://www.iPathETN.com) or EDGAR on the SEC website at [www.sec.gov](http://www.sec.gov). Alternatively, Barclays Bank PLC will arrange for Barclays Capital Inc. to send you the prospectus if you request it by calling toll-free 1-877-76-iPATH, or you may request a copy from any other dealer participating in the offering.

BlackRock Fund Distribution Company assists in the promotion of the Securities.

iPath ETNs (the "Securities") are unsecured obligations of Barclays Bank PLC and are not secured debt. The Securities are riskier than ordinary unsecured debt securities and have no principal protection. Risks of investing in the Securities include limited portfolio diversification, trade price fluctuations, uncertain principal repayment, and illiquidity. Investing in the Securities is not equivalent to direct investment in index or index components. The investor fee will reduce the amount of your return at maturity or on redemption, and as a result you may receive less than the principal amount of your investment at maturity or upon redemption of your Securities even if the value of the relevant index has increased. An investment in iPath ETNs may not be suitable for all investors.

The Securities may be sold throughout the day on the exchange through any brokerage account. There are restrictions on the minimum number of Securities you may redeem directly with the issuer as specified in the applicable prospectus. Commissions may apply and there are tax consequences in the event of sale, redemption or maturity of Securities. **Sales in the secondary market may result in significant losses.**

iPath ETNs typically have lower investor fees than currently existing mutual funds that invest in similar markets and are available to retail investors. Buying and selling iPath ETNs will result in brokerage commissions.

The index components for iPath ETNs linked to commodities indexes are concentrated in the commodities sector. The market value of the Securities may be influenced by many unpredictable factors, including, where applicable, highly volatile commodities prices, changes in supply and demand relationships; weather; agriculture; trade; pestilence; changes in interest rates; and monetary and other governmental policies, action and inaction. Index components that track the performance of a single commodity, or index components concentrated in a single sector, are speculative and may typically exhibit higher volatility. The current or "spot" prices of the underlying physical commodities may also affect, in a volatile and inconsistent manner, the prices of futures contracts in respect of the relevant commodity. These factors may affect the value of the index and the value of your Securities in varying ways.

In addition to factors affecting commodities generally, index components composed of futures contracts on industrial metals or energy-related commodities may be subject to additional factors specific to industrial metals or energy-related commodities that might cause price volatility. These may include changes in the level of industrial or commercial activity using industrial metals or with high levels of energy demand; the availability and price of substitutes such as man-made or synthetic substitutes or alternative sources of energy; disruptions in the supply chain; adjustments to inventory; variations in production costs; costs associated with regulatory compliance, including environmental regulations; and changes in industrial, government and consumer demand, both in individual consuming nations and internationally. Index components composed of futures contracts on agricultural products

may be subject to additional factors specific to agricultural products that might cause price volatility. These may include weather conditions, including floods, drought and freezing conditions; pestilence; changes in government policies; planting decisions; and changes in demand for agricultural products, both with end users and as inputs into various industries. Index components composed of futures contracts on precious metals may be subject to additional factors specific to precious metals that might cause price volatility. These may include disruptions in the supply chain, variations in production costs, costs associated with regulatory compliance, including environmental regulations, changes in industrial, government and consumer demand, and in the case of gold and silver, precious metal leasing rates, currency exchange rates, the level of economic growth and inflation and the degree to which consumers, governments, corporate and financial institutions hold physical gold or silver as a safe haven asset (hoarding) which may be caused by a banking crisis/recovery, a rapid change in the value of other assets (both financial and physical) or changes in the level of geopolitical tension.
